

TOSHIBA

Advantage Toshiba

- Full function 2 head VCR with 8 event, 1 month programming
- 13" screen size is portable and practical for viewing in virtually any location
- Front Panel AV Inputs for easy connection of video games or a camcorder
- Front Panel Headphone Jack allows for individual listening privacy
- AC/DC capability gives the option of viewing "on the go," or in the event of a power outage
- DC Car Cord included for convenient operation in an RV, boat or motor vehicle
- Sleep Timer saves energy and Wake Timer is a convenient alternative to a clock radio

Technology and Benefits

VIDEO

Bi-Lingual Onscreen Display

Allows viewer to read menu in two different languages (English and Spanish) to ensure user-friendly programming.

V-Chip

All Toshiba televisions comply with current V-Chip regulations. Violent or sexually explicit programming can be identified and blocked, prohibiting viewing by young children.

181 Channel Tuner

Provides access to all channels on unscrambled cable systems.

CONVENIENCE

Headphone Jack

For a private viewing, particularly useful with AC/DC models which are likely to be used in confined areas such as automobiles.

One Touch Record

Simplifies setup of timer for recording within a 24-hour period. One button starts record and allows setting of record length.

360 Minute On/Off Timer

Use the on timer as an alarm clock to wake up to your favorite movie. Or have the set turn off automatically when viewing in the evening.

Front A/V Inputs

Allows easy connection of camcorder or video game directly to the front of the set.

1 Month/ 8 Event Programmable Timer

High Speed Rewind/ Fast Forward

Rewind or Forward a standard T-120 tape in only 60 seconds.

Auto Play

Tape Play automatically begins when a pre-recorded tape is placed in the machine.

Auto Repeat

Pre-Recorded tape will rewind and begin play after initial play is complete.

Digital Auto Tracking

Constantly adjusts tape alignment for optimum picture quality.

Auto Clock Set

A convenience feature that automatically sets the proper time on the unit's internal clock.
